Örjan Johansson was one of the founders of the Bluetooth SIG which is the foundation for the Bluetooth de facto standard invented by Ericsson. At Ericsson he was also the Director & General Manager for Bluetooth Technology & Products. Before joining Ericsson, Mr. Johansson has experience from building and industrial automation. He was serving as a part of the management teams in automation companies related to Alfa-Laval, Tetra Pak, ABB and Incentive AB. Prior to the current positions, Mr. Johansson was Chairman of the Board and later President and CEO of Anoto Group AB on the Swedish stock exchange (ticker ANOT). Today Mr. Johansson, apart from working at Mashmobile as an executive Chairman of the Board, is serving as board member in a few Swedish tech companies.
